25X1

[redacted] Talked with William Irvine, House Post Office and Civil Service Committee staff, about the Dual Compensation bill, H.R. 7381. I queried Irvine as to why the bill was not brought up on the consent calendar as originally planned. Irvine said that in view of the attitude of the House on Monday (the members voted down an Armed Services bill), the leadership decided not to take up the bill on the consent calendar at that time. Irvine was not certain whether they would attempt to have the bill brought up on the calendar on 13 December or try to get a rule from the Rules Committee. We will keep in touch with the Committee on this.

25X1

[redacted] Ewing Hase, Administrative Assistant to Senator Thomas H. Eichel, asked if we would look into correspondence from a constituent in Beverly Hills, California alleging that CIA paid for cosmetic surgery performed on Madame Nhu. I told Hase we would look into this and be in touch with him.

25X1

[redacted] In response to his inquiry yesterday, I advised Mr. Goulding, in the office of Senator Fell, that on 2 December we had written to [redacted] advising him that we did not have an opening for him at this time but would keep him in mind for any future openings that may develop. Goulding thanked me for this information and gave me the impression that he merely wanted a status report on this application.

[redacted] Delivered to James Kendall and [redacted] Senate Preparedness Investigating Subcommittee staff, an unclassified summary of information on Communist terrorist activities in Venezuela from 1 November to the present. I advised [redacted] and Kendall that I understood the Director had talked with Senator Stennis on this subject and, therefore, we were providing them with only the unclassified paper. Kendall said he knew that Senator Stennis had talked with Mr. McCone following the Director's last briefing of the CIA Subcommittee and said this paper would suffice at least for the present.

STAT 5. [ ] Mario Fellom, Administrative Assistant to Senator Allen J. Ellender, called regarding an inquiry they had received from their state forestry association. The inquiry concerns recent news articles regarding a type of paper which dissolves instantly in water. Fellom said the association was interested in knowing more about this. I suggested that, without reference to our conversation, he raise this question with the FBI.

STAT 6. [ ] Mrs. Mower, in the office of Representative Charles Mathias, called to say that the Congressman had heard a radio broadcast over station WPCN to the effect that there was rioting in Cuba. Mathias questioned whether we had any information we could pass on to him on this. I advised Mrs. Mower that I was not personally aware of any information to this effect but suggested that on matters of this sort they contact Mr. John Crumrine, of State Department, who is responsible for matters concerning Cuba.

STAT 7. [ ] called and indicated that, on behalf of Senator Stennis (Chairman of the Senate Preparedness Investigating Subcommittee), he was requesting a summary of Communist activities in Venezuela in the month of November. [ ] said he did not know what use the Senator intended to make of this paper but said they would prefer to have it on an unclassified basis. He added that if any classified information was necessarily involved if we would identify the classified aspects. He asked if this could be made available by close of business tomorrow. I advised [ ] that I would look into this and be in touch with him. Earl Wagner, CGI, is having his people prepare a suitable paper.
